## Living well beginnd with eating well.

Over its history as a food the main uses of honey are in cooking, backing,deserts, as a spread on bread, as an addition to various beverges such as tea, and as a sweetener in some commercial beverges

beverages such as tea, and as a sweetener in some commercial beverages.

Due to its energy density, honey is an important food for virtually all hunter-gatherer cultures in warm climates, with the Hazda people ranking honey as their favorite food.
